DETAILED ACTION

Claims 1-18 are pending in this application.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to compounds (of formula shown in claim 1) wherein A is a five membered monocyclic heterocyclic ring consisting of one ring nitrogen (i.e., pyrrolidine) and V is carbocyclic radical (e.g., phenyl), corresponding composition and method of use, classified in class 540-548, subclass various (depending on various substituents).
- II. Claims 1-5 and 8-18, drawn to compounds other than those of Group I, corresponding composition and method of use, classified in various class/subclasses (depending on the definitions of variables U, V, A and B).

Note: Group II is a phantom group and obviously embraces multiple inventions, but is not further subdivided as there are no disclosed species or subgenera. If Group II is elected, further restriction/election may be required.

The inventions are distinct, each from the other because of the following reasons:

Groups I-II are drawn to structurally dissimilar compounds. They are made independently and used independently. They would be expected to raise different issues of patentability if a compound of Group I, consisting of pyrrolidine compounds were anticipated,

Art Unit: 1624

the anticipatory reference would not necessarily render obvious the compounds of Groups II or vice-versa. They are not art recognized equivalents, they are classified separately and require separate burdensome searches in the literature and computer databases.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Further, **along with the election of a single group from above, election of a single disclosed species that falls within that group is also required.** Claims are generic to a plurality of disclosed patentably distinct species comprising the species disclosed in the examples. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1624

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deepak Rao whose telephone number is (703) 305-1879. The examiner can normally be reached on Tuesday-Friday from 6:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Mukund Shah, can be reached on (703) 308-4716. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.

A handwritten signature in black ink, appearing to read 'Deepak Rao', with a stylized flourish at the end.
